

Included in Our Training Sessions

Our dog training services involve one-on-one sessions between our professional dog trainer, your dog, and your family. The content of private dog training sessions can vary based on you and your dog's specific needs and goals. However, common elements typically include:

Training Assessments

The trainer will assess the dog's skill set, temperament and any specific issues or challenges you want to address.

Hands-On Training

The trainer will work directly with your dog and you, demonstrating techniques and guiding you through exercises to teach desired actions and redirect problematic ones.

Progress Tracking

Throughout the training sessions, the trainer will monitor your dog's progress and adjust the training plan as needed to ensure continued improvement.

Problem-Solving

The trainer will address any specific training problems or challenges you are experiencing and provide guidance on managing or redirecting them effectively.

Follow-Up Support

Our trainers offer follow-up support, such as email follow-ups, video aids, and infographics, to answer questions and provide guidance between sessions.

Customised Training Plan

Based on the assessment, the trainer will develop a personalised training plan tailored to your dog's needs and your goals. This plan may focus on obedience training, mutually exclusive alternatives, socialisation needs, or specific skills such as leash walking or recall.

Positive Training Environments

Our dog trainers use positive reinforcement techniques, such as treats, praise, and toys, to encourage desired behaviours and create a positive learning environment for the dog. We also love to promote game training to build better bonds and increase motivation.

Owner Education

In addition to working with your dog, our trainers educate you on key canine behaviours, communication, and effective training methods, empowering you to continue training and reinforce desired behaviours outside of sessions.

Overall, our private dog training provides individualised attention and support to address you and your dog's unique needs, leading to more effective and personalised training outcomes.
